

## **Hope You Have Many Cattle**

### **Lexicon of Royle Couched Words**

Can we be too secure to ask where did our ideas of being Irish/ British/ Welsh/ Scottish and how we think came from and what words are relevant to our identity today and why? Complacency and even indolence induces a false security in oneself. Do we believe that by searching for new meanings to 'an established word set' may give rise to a feeling of insecurity and a judgement that someone else might make? Are we just Royle in a sitcom and too couched to be provoked to think?

Feeling secure in oneself is a rich experience and encourages self-reliance by believing in our ability to cope and not restrained by anxiety or lack of ability. We must not ignore our fundamental vulnerabilities and the dangers associated with feeling excessive security and relying on 'other powers and strength'. Questioning the infallibility of others must be a cornerstone to our cultural longevity that can only eventually enrich us as a nation and embrace healthy economics. Failure to do that numbs joy, happiness, and gratitude and brings an early death to our dreams of life as we had wanted it to be.

Implementation, extrapolation and the revelations in these new founded ancient words and their original meanings in this compiled African compendium will contribute to the foundations on which we should build our reformed lives and will encourage us to make this in rock and not on sand.

This can be seen as a new philosophical stone to build on and offers more resources and opportunities for others to research and discover and make the Isles of Britain and Ireland a more interesting place than what we already know.

Our ideas of truth and knowledge learned from this compendium will match the insecurity of truth and falsity and right or wrong and remove all the numbness we have had to date.

We have to accept that what we believe might be false, what we do in good faith might be wrong, what we make most real might be an illusion. At the same time, we must do our best to get as close to the truth and good and the real as we can. Philosophically, we are walking a tightrope, thinking without a safety net.
